

Project Design Phase

Problem – Solution Fit Canvas

Date	02 July 2026
Team ID	SWTID-2026-4978
Project Name	Strategic Product Placement Analysis
Maximum Marks	2 Marks

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

1. CUSTOMER SEGMENT(S)

- **Primary User:** Retail Store Operations Managers and Category Planners.
- **Characteristics:** Responsible for spatial layout performance, revenue tracking, and maximizing shelf profitability.

2. JOBS-TO-BE-DONE / PROBLEMS

- **Core Task:** Arrange and position store product segments (Food, Clothing, Electronics) based on actual sales volumes.
- **Friction:** Eliminating arbitrary guessing and legacy operational layout habits.

3. TRIGGERS

- Sudden dips in profit margins or product category sales velocity.
- Corporate directives demanding metric validation before approving structural brick-and-mortar storefront layout changes.

4. EMOTIONS (BEFORE / AFTER)

- **Before:** Frustrated and overwhelmed by massive row-level spreadsheet transaction logs that lack scannable visual patterns.
- **After:** Confident and empowered to back up spatial display modifications using visual empirical evidence.

5. CUSTOMER CONSTRAINTS

- No coding background; unable to run complex ad-hoc database queries manually.
- Limited operational window to digest complex multi-variable reporting files.

6. PROBLEM ROOT CAUSE

- Transaction logs, competitor benchmarks, and localized consumer demographic paths remain entirely fragmented across disconnected CSV files.

7. BEHAVIOUR

- Currently defaulting back to generic layout routines or subjective intuition due to the lack of an easy analytics interface.

8. AVAILABLE SOLUTIONS

- Static legacy reports, manual spreadsheets, or expensive third-party retail consultative tracking engines.

9. CHANNELS OF BEHAVIOUR

- **Online:** Tableau Cloud, shared web browsers, secure intranet portals.
- **Offline:** Physical store floor walkthroughs, regional layout planning huddles.

10. YOUR SOLUTION

- **Consolidated 8-Sheet Interactive Tableau Story:** An integrated, cross-filtered diagnostic workspace that instantly bridges store positioning dimensions, product price matrices, and consumer demographic groups.
