

Project Design Phase-II

Data Flow Diagram & User Stories

Date	02 July 2026
Team ID	SWTID-2026-4978
Project Name	Strategic Product Placement Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

System Logical Flow Data Mapping (DFD Level 0 Breakdown):

- Data Source Intake:** Raw transactional log attributes (Product Positioning.csv) are natively parsed and fetched into the Tableau engine environment.
- Transformation Processing:** The calculation layer groups record parameters by display positions (Aisle, End-cap, Front) and calculates total sales volume lifts against competitor price baseline vectors.
- Visual Output Distribution:** The rendering interface passes active metrics onto interactive charts (Treemaps, Bars, and Donuts) governed by cross-sheet action filters.

User Stories:

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Store Operations Manager	Spatial Inventory Allocation	USN-1	As a store manager, I want to view a spatial Treemap chart of product categories so that I can instantly pinpoint which locations yield the highest sales volumes.	Selecting a category highlights its distribution immediately.	High	Sprint-1
Store Operations Manager	Competitor Benchmarking	USN-2	As a store manager, I want to compare our average prices with local competitor values across departments to adjust promotional exposure layouts.	Side-by-side bar plots display clear benchmark gaps.	High	Sprint-1
Category Planner	Demographic Alignment	USN-3	As a category planner, I want to isolate volume preferences by customer types (Families, Students, Seniors) using dedicated donut segment filters.	Interactive clicks drill down into specific buyer categories.	Medium	Sprint-1
Category Planner	Cross-Filtering Actions	USN-4	As a category planner, I want to apply a global filter action across the dashboard workspace so that changing one selection updates all charts simultaneously.	All worksheets refresh within 2 seconds.	High	Sprint-1
